

April 15, 2021

Dear Member of Congress:

On behalf of our millions of members and supporters nationwide, **we write to you in support of the End Polluter Welfare Act of 2021**. This legislation would lower climate emissions, reduce pollution and related harm in frontline communities, and raise an annual \$15 billion in new revenue.

The End Polluter Welfare Act remains the most comprehensive legislative proposal to address the billions in special interest subsidies that disproportionately benefit the oil, gas, and coal industries. These subsidies include century old tax loopholes, giveaway leasing rules for extraction on our public lands and waters, and the misallocation of billions for fossil fuel projects through export credit and development finance agencies.

As President Biden recently emphasized, fossil fuel subsidies must be repealed. As conversations continue towards an infrastructure package, the End Polluter Welfare Act is an opportunity to advance key climate and public health priorities while raising revenue for much needed investments in a more just and resilient society.

Sincerely,

Americans for Tax Fairness
